

TIME TRAVEL ENFORCEMENT AGENCY AN INVESTIGATION IS UNDERWAY

A division of the T.T.E.A. are beginning a fresh investigation following Professor Pickles' theory about what a G.H.O.S.T. could potentially be. The team are looking again into popular ghost stories to identify whether these are in fact time-travellers from the future that have become trapped in the past. 'We are following this theory as we have no reported missing Time-travellers at this PRESENT TIME'. Major J.Blandenburg of the T.T.E.A.

'OUT OF THIS TIME' WORKSHOP

Bespoke Time Machines is our business! Let us help you create that personal machine from furniture close to your heart...be it a wardrobe, 4 poster bed, diving bell or even an enamel bathtub! This Spring we are even fitting your chosen TTE model free of charge!

CW'S MONTHLY - 'SPOT THE TIME TRAVELLER'
Having trouble? The award this issue goes to Ted Rogers in the centre! 'Pennyfarthings are timeless!' - TR Only the best costumes will do, learn to blend in with period accurate clothing and accessories. Visit us at: www.costumewardrobe.com

Issue 2

Shakespeare Editon

Helping to fuel the Time Travellers of tomorrow - TTI Chronicle & Timebubble Toys Ltd. Working together to raise the profile of the ever expanding Time Travel Industry.

Copyright © 2017 Timebubble Toys Ltd.

T O M P S O N ' S T I M E T R A V E L A G E N C Y
Continuing the Shakespeare theme in this season's Chronicle, we are putting on a special excursion to the Globe Theatre in London to 1601 to see a performance of Twelfth Night. This we feel will be especially memorable, seeing this famous play performed by men playing women, playing men! Beyond the Pit - ensure you adhere to Elizabethan dress codes to allow you to take seats in the higher gallery. Read up on 'sumptuary laws'.

HOPKIN'S GARAGE
- FULL SERVICING & MOTS

Want your Theseus Thread Encapsulator to run on the latest BubbleJuice 'Formula 8' Why look no further than Hopkin's Garage for a complete Engine overhaul.

'All the World's A Stage'

Make the most of this Season's Offer!

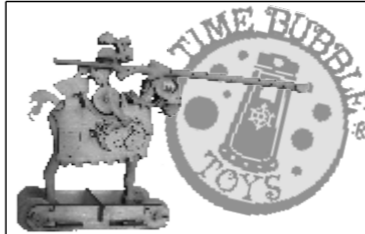

Thompson's Time Travel Agency

Issue 3 - Timebubble Toys send employee back to 1922 to gauge Howard Carters' response to the 'King Tut Desk Buddy!'

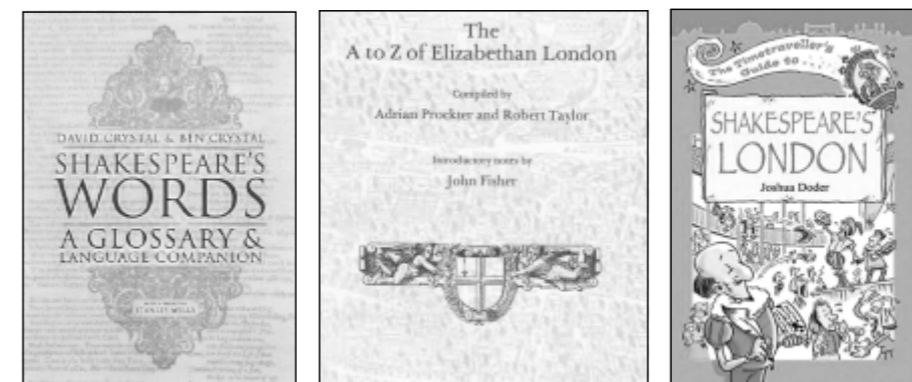

The Online Toy & Gift Shop

Historically themed wooden construction kits, games & toys for all ages. Inspired by Time Travelling Adventures. Kits are quick & easy to build.

www.timebubbletoys.co.uk

'Ever since I was a kid I've wanted to see dinosaurs but without your C.D.I. I probably wouldn't be here today - continental drift is a real problem to Time Travellers, don't make the same mistake I did! - thanks Continental Drift Inflatables!' Ed Spoon, Cornwall

RECOMMENDED READING BEFORE YOU TRAVEL
This issue focuses on those considering a Shakespearean Adventure! You are sure to visit the Globe but it is strongly advised that you avoid the summer in the year you decide to travel as the plague is rife. David & Ben Crystal's 'Shakespeare's Word' is an invaluable resource to Shakespeare's masterpieces & comes highly recommended. As for finding your way around London, we advise you take the A-Z of Elizabethan London, compiled by Adrian Prockter and Robert Taylor - a marvellous pictorial representation of buildings and streets alongside the Thames. For those of you taking younger passengers, we suggest 'The Time Travellers Guide to Shakespeare's London' by Joshua Doder.

'MY QUESTION TO THE PROFESSOR'

Previous Issue -
'When visiting a period in history, why can we sometimes interact with those around us and at other times we cannot be seen and are, as you put it, a 'GHOST'- merely General Historical Observers In Space and Time?'

Margaret Winterbottom

Dear Winterbottom, thank you for your most perceptive question. As with all things relating to TIME, it is a highly complex matter, however, I shall do my best! It comes down the phantasmagorical 'Timebubble' created by the Theseus Thread Encapsulator (TTE) within each Time Machine. This Bubble offers reassurance to the time traveller as it allows them to experience something of the period in history they have returned to, without the fear of disturbing the Space Time Continuum, ie. threatening their own or other's existence in the future. You may recall this was outlined by the TTEA in Issue 1 of the TB Chronicle. The dimensions of the 'Timebubble' depend entirely upon the model & quality of the T.T.E. fitted, but for the standard 620 model this extends to around 1 mile radius from the given machine. It is at the edge of this radius that the traveller will experience a feeling of being misheard or even un-noticed as they begin to take a more ethereal form, ie. more a 'presence' to those around than a physical body. Beyond the safety of the 'Bubble', a traveller will be devoid of the ability to speak and interact. In short they are in danger of being lost to Time, that is, they are merely a G.H.O.S.T. To tackle this problem, the TT Industry have devised the 'Mumbler'. A device not unlike a wifi range booster. Travellers often disguise this on their person in something they are carrying such as an umbrella, walking stick, 'Sonic Screwdriver!' Again, the more you spend on such a device the greater the range!

'MY QUESTION TO THE PROFESSOR'

'Could the bubbles in Guinness be the answer to travelling forward in TIME?' Dan Bertlitz
